Profile Objectives

Results-driven Data Analytics Specialist with a Computer Science degree and Google Advanced Data Analytics certification. Proven ability to handle the full data lifecycle, from extraction and preprocessing to generating actionable strategic insights. Highly proficient in Python, SQL, Excel, Power BI, and Tableau for creating dynamic dashboards that drive decision-making and optimize performance.

Skills

- SQL (SQL Server, BigQuery, PostgreSQL)
- Python (Pandas, NumPy, SciPy, MatPlotLib)
- Tableau
- Excel (VLookup, Conditional Formatting, Pivot Tables)
- Statistical Analysis
- Machine learning
- Microsoft Power BI

Experience

MEL VOLUNTEER (MONITORING, EVALUATION & LEARNING) – Jordan River Foundation Feb – March 2026

- Conducted structured phone-based surveys for primary data collection to support MEL activities.
- Cleaned and organized collected datasets using **Microsoft Excel** to ensure data accuracy and consistency.
- Assisted in maintaining data quality for reporting and analysis purposes.
- Used KoBo Toolbox for data collection and survey management.
- Developed strong skills in communication, data handling, and attention to detail.

Projects

TELCO CUSTOMER CHURN ANALYSIS – Personal Project

- Cleaned and processed 7,000+ records using **Excel** and **SQL (PostgreSQL)** to ensure data accuracy.
- Analyzed churn drivers, identifying a 45% churn rate among Electronic Check users and high-risk month-to-month contracts.
- Developed a **Power BI** dashboard to visualize customer behavior and provide data-driven retention recommendations.

CYCLISTIC BIKE-SHARE DATA ANALYSIS – Personal Project

- Cleaned and transformed 6M+ bike-trip records using **SQL (BigQuery)** and **Excel**, creating analytics-ready datasets.
- Aggregated trip metrics and trends to understand rider behavior (trip counts, duration, bike type).
- Developed a **Tableau** dashboard showing casual riders take longer trips and members ride more frequently.

EMPLOYEE ATTRITION PREDICTION – Personal Project

- Cleaned and prepared HR datasets using **Python** and **Pandas**, including EDA and feature engineering.
- Developed a **Random Forest model** achieving 94% F1-score, accurately predicting employee attrition.
- Identified high-risk employees using satisfaction, workload, and performance data to support HR retention strategies.

TAILWIND TRADERS SALES & PROFIT ANALYSIS– Personal Project

- Cleaned and transformed sales data in **Excel** and imported it into **Power BI**, ensuring accurate and analytics-ready datasets.
- Built **DAX** measures and established data relationships to calculate key metrics like Profit Margin, Median Sales, and YTD performance.
- Developed an interactive **Power BI** dashboard visualizing sales and profit trends, supporting data-driven business decisions.

HR ANALYTICS DASHBOARD – Personal Project

- Built an HR dashboard in **Power BI** analyzing workforce demographics and departments (2,845 employees).
- Provided insights on $1.59M training investments to support employee retention.

Education

Bachelor's Degree in Computer Science – Middle East University – Amman, Jordan Jul 2025

Courses

- **Associate Data Analyst in SQL Certificate –** DataCamp Dec 2025
- **Microsoft Power BI Professional Certificate** - Coursera Oct 2025
- **Artificial Intelligence Training Program – Data Science Track** - SHAI Sep 2025
- **Google Advanced Data Analytics Professional Certificate** - Coursera Jun 2025

Languages

- **Arabic:** Native (written and spoken)
- **English:** Intermediate (written and spoken)
